

COVID-19

Pay attention
to **all of these**
symptoms!

Sudden and unexplained symptoms:

- taste disturbance and/or loss of smell
- fatigue
- muscle pain
- headache
- lack of appetite
- diarrhoea
- acute state of confusion
- fall

But also to well-known symptoms such as:

- **influenza:** fever, painful coughing, shortness of breath, pain in the chest
- **cold & sore throat**
- **deterioration of chronic respiratory problems:** chronic obstructive pulmonary disease, asthma, chronic coughing...

Stay at home and contact your GP.
